# UNIVERSAL KRAFT GLOBAL RENEWABLES PORTFOLIO

UNIVERSAL KRAFT BOASTS AN IMPRESSIVE TRACK-RECORD FROM HISTORICAL PROJECTS COMBINED WITH A LARGE PROJECT PORTFOLIO, COVERING A BROAD RANGE OF ENERGY SOURCES AND GEOGRAPHIES GLOBALLY

- Universal Kraft, has focused on renewable energy for the last 25 years, operating globally with various technologies.
- The group prioritizes sustainable energy solutions addressing energy efficiency from the consumer side, and extending to production through small-scale hydro, wind, solar, battery storage (both utility-scale and decentralized), compressed air storage, green hydrogen, and ammonia.
- 70 highly skilled professionals constantly growing the portfolio alongside partners and clients.
- The company is actively developing 6+ GW, with a pipeline of 9 GW, spread across various geographical locations, from its Scandinavian-Iberian base to the Americas and Asia.

## Legend

-  Mini Hydro
-  Wind
-  Solar
-  Hydrogen
-  Ammonia
-  Energy storage

## MULTIFACETED GROUP

With companies specialised in renewable energy solutions

**+6GW**

Over 100 active projects in development

## GLOBAL OPERATIONS

Growing companies across 4 continents, in 5 countries

**+70**

Highly skilled professionals

**+20**

Years in the industry

**+9 GW**

Over 300 projects in pipeline

## Historical projects by geography

AUSTRALIA 	COSTARICA  	FRANCE 	MOROCCO 	ST. VINCENT 
BRAZIL   	DENMARK 	GUATEMALA  	PANAMA 	SWEDEN    
CANADA   	DOMINICAN  	INDIA 	PORTUGAL  	TAIWAN  
COLOMBIA    	FINLAND 	ITALY 	SPAIN    	USA  

# UNIVERSAL KRAFT AT A GLANCE

WITH A SEASONED TEAM AND A PROVEN TRACK-RECORD OF SUCCESSFULLY EXECUTING LARGE-SCALE PROJECTS, THE COMPANY HAS POSITIONED ITSELF AS A LEADING SOLAR PV DEVELOPER COVERING THE DEVELOPMENT AND OPERATIONAL PROCESSES

## UNIVERSAL KRAFT IN BRIEF

From Swedish origins, Universal Kraft has focused on renewable energy solutions<sup>1</sup> for over 20 years. As a developer of large-scale ground-based power projects, Universal Kraft has the vision to start from standardized midsize and scalable production units, to be able to optimize risks of grid constraints and potential power output, and also prioritize serving off-grid communities.

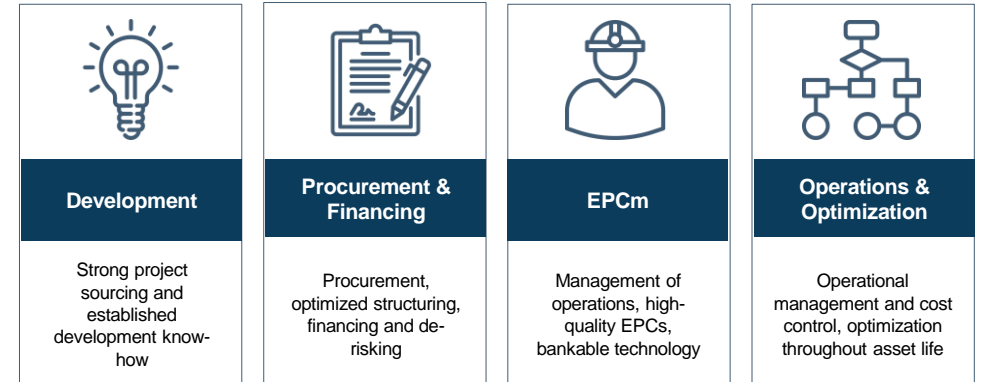

Universal Kraft has a highly diversified and multi-cultural team consisting of over 60 experienced professionals covering all necessary fields of expertise, allowing for quick and effective adaptation in a highly unsaturated market. The team has a proven track-record.

The Company is active all the way from the greenfield stage and adds value by being involved in all parts of development, construction and operational stages.

## UNIVERSAL KRAFT'S AREAS OF ACTION

## HISTORY OF BUSINESS HIGHLIGHTS

From a **Swedish starting point**, the group had an initial focus on **energy efficiency**

Expansion to **wind energy** projects, active from greenfield to operations

**Universal Kraft Nordic** is formally founded, strengthening the Swedish solar operations and marking the start of the current group

Official establishment of **Universal Kraft Portugal**

Incorporation of **UH2**, company for large scale green hydrogen and ammonia developments

Development of **battery storage capacity** projects, +700 MW for large scale storage

2000

From a Swedish starting point, the group had an initial focus on energy efficiency

First **mini hydro** development in North of Sweden

2004

Expansion to wind energy projects, active from greenfield to operations

Started participating in the **solar PV market** by developing larger scale ground-mounted solar projects

2010

**Universal Kraft Nordic** is formally founded, strengthening the Swedish solar operations and marking the start of the current group

Creation of **Energy Air Storage** for alternative energy storage solutions

2018

Official establishment of **Universal Kraft Portugal**

Official establishment of operations in **Canada** and **Spain**

2019

Incorporation of **UH2**, company for large scale green hydrogen and ammonia developments

Development of **green hydrogen and ammonia** projects

2021

Development of **battery storage capacity** projects, +700 MW for large scale storage

2023

## OUR COMPANIES

[UH2](#) specializes in green hydrogen and green ammonia energy solutions. Committed to a sustainable, reliable, and affordable energy system with a rapid market growth, UH2 works on solutions for green power production, distribution, and storage. UH2 is currently developing H2 and NH3 projects in Brazil, Canada, Portugal, Spain, and Sweden.

[Solar Parking](#) specializes in transforming spaces like parkings and rooftops into sustainable and green energy producing units. Solar Parking expertly carries out projects worldwide through a production-consumption-storage flow providing the means to a fully decarbonized installation while adding better utilization of these spaces.

[Energy Air Storage](#) is a company dedicated to renewable energy storage solutions. We aim to fill the gap on large-scale energy projects with our multifaceted solutions that range from batteries, compressed air, and pump hydro. Our solutions adapt to each project needs and are fully integrated with the power production.

[Island Power Solutions](#) develops renewable energy projects for islands. We create tailor-made solutions for off-grid systems combining green energy production and storage. At Island Power Solutions we work closely with partners and local communities all to create efficient systems that help islands effectively access all their resources to generate cleaner and reliable energy.

[Universal Collect](#) is the non-profit organization of Universal Kraft. Our mission is to promote sustainable initiatives with a direct and positive impact in society. We want to generate a real positive impact using the companies' competencies to reduce the carbon footprint and drive change to a greener world.

[Capacity Reserve](#) focuses on BESS in Universal Kraft's core markets, nearing 1 GW in development. We integrate advanced storage solutions to enhance grid reliability and optimize energy distribution, whether standalone or collocated. With our expertise in transition and storage technologies, we play a critical role in balancing a growing share of renewables on the grid.
